PROFILE

Second-year Computer Science Engineering student with a strong interest in technology and problem solving. Currently learning Data Structures, Machine Learning, and building hands-on projects to solve real-world problems. Experienced in developing web and machine learning projects using Python and modern technologies. Interested in applying technical skills to solve practical problems and continuously learning new technologies.

EDUCATION

Pandit Deendayal Energy University

2028

Bachelor of Engineering (B.E.) in Computer Science and Business System
Lateral Entry (Direct Second Year)
Current CGPA: 9.27

R.C. Technical Institute

2025

Diploma in Engineering
Completed: 2025
Overall CGPA: 9.53

TECHNICAL SKILLS

Programming Languages — Python, C, C++

Concepts — Data Structures & Algorithms, Object-Oriented Programming (OOP), Machine Learning Fundamentals, Artificial Intelligence Fundamentals

Frontend — MERN Stack, HTML, CSS

Framework & Libraries — NumPy, Pandas, Matplotlib, Scikit-learn, TensorFlow, OpenCV, Streamlit

Databases — PostgreSQL, MongoDB, SQL

Tools — Git, GitHub, VS Code, Jupyter Notebook, Postman, Docker

Cloud Technology — AWS | Azure

Backend Development — FastAPI, Flask, REST APIs, JWT Authentication

RELEVANT COURSEWORK

- Database Management Systems
- Object Oriented Programming(C++)
- Operating System
- Computer Organization and Architecture
- Design and Analysis of Algorithms

INTERNSHIP / TRAINING

Data Science & Machine Learning Intern

BrainyBeam Technologies

- Completed a 45-day internship focused on Python, Data Science, and Machine Learning.
- Worked on data preprocessing, exploratory data analysis, and basic ML models using NumPy, Pandas, and Matplotlib.

AI/ML Intern

Techify Solutions Pvt. Ltd.

- Completed a 2-month internship focused on FastAPI, Machine Learning, and AI fundamentals.
- Worked on the GoMoto real-world project, developing backend APIs using FastAPI.
- Built an independent AI/ML project applying machine learning concepts and Python.

PROJECTS

Ticket Management System

Tech Stack: FastAPI, Python, PostgreSQL, SQL

- Developed a ticket management system for creating, tracking, updating, and resolving support tickets.
- Built REST APIs using FastAPI and integrated PostgreSQL for efficient data management.

Food Calories Prediction (NutriLens)

Tech Stack: Python, FastAPI, YOLOv8, Machine Learning, PostgreSQL

- Built an AI-powered food calorie prediction system using YOLOv8 and FastAPI.
- Integrated nutrition data and developed REST APIs for meal tracking and calorie estimation.
